today jazz is considered high art america s national music and the catalog of its recordings its discography is often taken for granted but behind jazz discography is a fraught and highly colorful history of research fanaticism and the intense desire to know who played what where and when this history gets its first full length treatment in bruce d epperson s more important than the music following the dedicated few who sought to keep jazz s legacy organized epperson tells a fascinating story of archival pursuit in the face of negligence and deception a tale that saw curses and threats regularly employed with fisticuffs and lawsuits only slightly rarer epperson examines the documentation of recorded jazz from its casual origins as a novelty in the 1920s and 30s through the overwhelming deluge of 12 inch vinyl records in the middle of the twentieth century to the use of computers by today s discographers though he focuses much of his attention on comprehensive discographies he also examines the development of a variety of related listings such as buyer s guides and

library catalogs and he closes with a look toward discography's future from the little black book to the full featured online database more important than the music offers a history not just of jazz discography but of the profoundly human desire to preserve history itself

the record of each copyright registration listed in the catalog includes a description of the work copyrighted and data relating to the copyright claim the name of the copyright claimant as given in the application for registration the copyright date the copyright registration number etc
