scientific essay from the year 2021 in the subject business economics accounting and taxes language english abstract  
hardly any other cost accounting method is as versatile and universally applicable as contribution margin accounting  
from simple production program decisions to transport optimization or high bay warehouse planning there are numerous  
possible applications the counterpart to direct costing is absorption costing absorption costing is suitable for small and  
medium sized companies for companies with a small or no cost accounting system in general both cost accounting  
systems should have a smaller cost center accounting because the full cost accounting allocates the entire costs as the  
name already indicates full costs to the cost objects products services for this you need the cost centers to allocate  
allocate the entire costs of the company to the cost objects that is the cost objects are the bearers of the costs because  
the costs are raised for them because they are the end products that the company offers to the market end consumer  
and therefore these end products cost objects must also recover these full costs total costs through the sales price to  
the end consumer including a profit margin coenenberg et al 2016
